

Product Information

Recombinant Anti-Human IL5 Antibody Fab Fragment

Cat. No.: **MOM-18031-F(P)**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Humanized (from mouse) Antibody Fab Fragment specifically binds to Human IL5, expressed in E. coli

Antigen Description

Interleukin 5 or IL-5 is an interleukin produced by T helper-2 cells and mast cells. Through binding to the IL-5 receptor, IL-5 stimulates B cell growth and increases immunoglobulin secretion. It is also a key mediator in eosinophil activation.

Specific Activity

Tested positive against native antigen.
