

Product Information

Recombinant Anti-Human TNFSF13B Antibody

Cat. No.: **MOM-18216**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Human Antibody is against Human BAFF, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

Cytokine that binds to TNFRSF13B/TACI and TNFRSF17/BCMA. TNFSF13/APRIL binds to the same 2 receptors. Together, they form a 2 ligands -2 receptors pathway involved in the stimulation of B-and T-cell function and the regulation of humoral immunity. A third B-cell specific BAFF-receptor (BAFFR/BR3) promotes the survival of mature B-cells and the B-cell response.

Tested positive against native antigen.
